IT director

“Help me reduce complexity, reinforce security, and delight my users.”

HPE GreenLake platform simplifies IT with a modern, secure, software-defined infrastructure. It delivers cloud-like ease of use while enabling you to keep your apps and data in their ideal environments and reduce the time you spend on maintaining legacy systems.

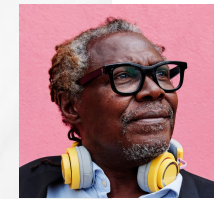

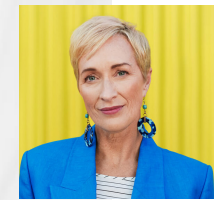

Easier operations: Let us take care of the heavy lifting, such as usage analysis, capacity monitoring, and proactive maintenance.

Simplified security: Easily provide role-based access for your users. You can relax, knowing that HPE GreenLake cloud services are protected by our trusted supply chain and industry-leading zero trust security architectures.

Accelerated provisioning: Give your users what they need—fast. Preconfigured offerings come in sizes to suit your needs, available with a few clicks. And with plug-and-play installation, setup and configuration at your site are quick and simple.

Chief Information Officer

“I want to innovate faster to increase profitability. To do that, I need the simplicity and speed of the cloud operating model for all of my apps and data.”

For reasons of data gravity, sovereignty, compliance, cost, and interdependencies, you can't move everything to the cloud. But you can bring the cloud to everything. HPE GreenLake platform delivers the cloud experience for all your IT assets, wherever they reside: in data centers, at the edge, and in colocations.

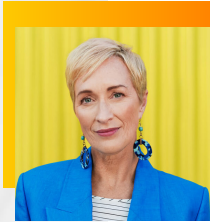

Agility: Rapidly add prebuilt solutions and capacity to deliver digital experiences faster. Experiment, scale, and iterate quickly with on-demand cloud services.

Visibility: Maintain security and compliance, track usage, and optimize costs with a unified view across your hybrid cloud.

Simplicity: Move faster with as-a-service, production-ready infrastructure for your most demanding workloads, managed for you, so you can focus on revenue opportunities.

in my role?

Developers and data scientists

“Give me fast, self-service access to resources and a wide choice of tools and app stacks.”

The HPE GreenLake platform is a fully automated, cloud-everywhere foundation for a truly cloud-native approach to development. You can manage development and production environments quickly and flexibly with continuous delivery, security, and application monitoring across all systems.

Self-service provisioning: Easily spin up the infrastructure and capacity you need with just a few clicks.

A wide range of solutions: Choose from a portfolio of preconfigured and fully customizable offerings, including everything from storage, compute, and networking to VMs, containers, data fabric, machine learning, and more.

Powerful application programming interfaces (APIs): Take advantage of our well-documented, secure, and scalable APIs and our developer portal to integrate your toolchains with the HPE GreenLake platform and automate your ecosystem.

Chief Financial Officer

“I need to manage spend across clouds and get better insights to mitigate risks.”

HPE GreenLake cloud services deliver a pay-per-use financial model that helps eliminate wasteful overprovisioning as well as the risks around underprovisioning while driving down TCO for infrastructure by as much as 45%.¹ The HPE GreenLake platform, gives you unprecedented visibility across IT operations.

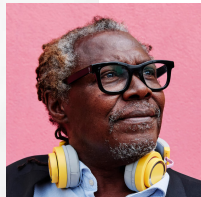

Predictable costs: Bypass the public cloud’s hidden fees and complicated billing with a simple, predictable monthly invoice.

Comprehensive insight: View usage and spend by service, project, location, or business unit, as well as within public and private cloud, data center, and edge environments.
